FEATURE

■ Optimized structure, easy operation

The metal protective cover of battery can be flipped over, which can effectively protect the battery;
The battery has simple cover with two combination modes, it can prevent the battery from plugging and unplugging at will.

■ Safe

The truck uses the second generation drive technology and brushless DC motor. There is no need to replace the carbon brush and the drive is more powerful.
Its max. Gradeability can reach 10% with the load of 1300kg.

■ New plug-in&out battery design

On-board charger with plug-in&out battery to satisfy different working condition.

Fast charging can be optionally equipped with.

Li-ion battery developed by EP is equipped with CAN and BMS, which is more convenient to use.

■ Rigorous design and convenient maintenance

Floating battery cartridge to protect battery contact pins.
